

March 21, 1989; 4:08 pm - Sue Kennedy of E&E called me re:

1. Midvale Slag: Sue is reviewing the MS RI/FS WP and will put her comments on yellow sticky papers. Hopes to finish it tonight and will be dropping it the out box tomorrow.

7086

We need to arrange a conference between Kevin Mackey, Sam Vance and/or Matt Cohn re access. Kevin has already on site with permission from the "site operator" and found no SW pathway to Jordan River.

FILE PLAN

Sam/Matt: Do we want to pursue the SW pathway anymore?

3.15

GW at MS was never sampled; the GW route was scored based on the potential of deep aquifer contamination.

Sam/Matt: can we use the new CDM data for the GW pathway?

2. Richardson Flat: Kevin Mackey and (probably) Annette Sackman would be the team visiting RF. The best date for them is Sat, April 1, 1989. I will confirm this date with UPCM.

I read the draft access agreement to Sue. She didn't think there would be too many problems unless UPCM wanted to be VERY sticky about the letter of the agreement.
